SUDABEH ZOLFI KHORRAM

Product Designer

Product Designer with 4+ years of experience across B2B and B2C digital products, complex systems, fintech, operational tools, and AI-enabled workflows. Strong in turning dense requirements into clear user flows, scalable interfaces, design systems, and production-ready experiences from early product thinking through developer handoff.

EXPERIENCE & PROJECTS

Product Designer - Algonet — Full-time (on-site)

Apr 2026 - Present

- Designing complex B2B and internal product experiences across dashboards, operational tools, and system-level workflows.
- Built a **custom design system** with reusable patterns and production-ready components in close collaboration with product and engineering teams.

Product Designer - AzMan — Remote

Oct 2025 - Present

- Designing **three separate products—AzMan, Hamgam Saz, and ERP**—each with distinct workflows across service, operations, and personnel management.
- **AzMan:** Designed the core product experience connecting customers with service providers, covering service requests, expert interactions, and key marketplace workflows across web and mobile.
- **Hamgam Saz:** Designed an operational product for managing and synchronizing call reports, follow-ups, contact history, and privacy-related workflows, helping teams keep customer interactions structured and traceable.
- **ERP:** Designed complex internal personnel-management workflows, including roles and access levels, operational scopes, document collection, contracts, guarantees, permissions, and organizational access.

Product Designer - Studio Kaaryar — Remote

Sep 2025 - Jan 2026

- Redesigned the full website for a social-impact design studio, improving information architecture, visual storytelling, accessibility, and clarity; built a **custom design system**. Design completed; currently in development.

Product Designer – Tamdid — Remote

Aug 2025 – Jun 2026

- Designed a fintech product for smart subscription and wallet management, covering payments, wallets, and gamification; built a **custom design system**. Design completed; currently in development.

UI/UX Designer - ChapAgha — Remote

Dec 2024 - Jan 2025

- Redesigned the responsive Product Listing Page for business cards, focusing on clearer layout and stronger mobile usability.

Product Designer - Novaday — Full-time (hybrid)

Sep 2024 - Jun 2025

Designed two B2B products using a Tailwind-based design system to improve consistency and streamline admin workflows.

- **Kudos**: Created clear documentation of flows and page logic to improve coordination between design and development And Enhanced UI with refined visuals; aligned closely with PM and QA for smooth delivery.

- **Remeet**: Designed a multilingual web and mobile access system with biometric (fingerprint/RFID) features, enhancing meeting and access management And Integrated with Outlook to automate bookings and optimize resource usage.

UI/UX Designer - Nan va Namak — Remote

Jun - Sep 2024

- Designed a responsive interface for web, mobile, and tablet with a focus on accessibility, usability, and clear content discovery.

UI / Visual Designer - Jaygah — Remote

Mar - Jun 2024

- Collaborated on B2B/B2C marketing packages and digital content, improving visual communication across campaign and social touchpoints.

Educational Content Designer - Alla Online School — Full-time (hybrid)

Aug 2021 - Apr 2023

- As a Educational Content Designer, Worked with cross-functional teams to design and structure educational content, improving visual clarity, layout, and overall learning experience
