Sudabeh Zolfi Khorram

Product Designer · Tehran, Iran · Open to remote

Product Designer with 5+ years of experience across B2B and B2C digital products, complex systems, fintech, operational tools and AI-enabled workflows. Strong in turning dense requirements into clear user flows, scalable interfaces, design systems and production-ready experiences, from early product thinking to developer handoff.

UI Design Specialist · 7Learn
HTML & CSS for Designers · Amanj

EXPERIENCE & PROJECTS

Product Designer · Algonet · Full-time (on-site) — Apr 2026 - Present

- Designing Atlas, an AI platform that maps how a company really works, plus complex B2B and internal experiences across dashboards, operational tools and system-level workflows.
- Built a custom design system with reusable patterns and production-ready components, in close collaboration with product and engineering.

Atlas case study ↗

Product Designer · AzMan · Remote — Oct 2025 - Sep 2026

- Designed three separate products, AzMan, Hamgam Saz and the ERP, each with distinct workflows across service, operations and personnel management.
- AzMan: the core experience connecting customers with service providers, covering service requests, expert interactions and key marketplace workflows on web and mobile.
- Hamgam Saz: an operational product for managing and synchronising call reports, follow-ups, contact history and privacy-related workflows, keeping customer interactions structured and traceable.
- ERP: complex personnel-management workflows, including roles and access levels, operational scopes, document collection, contracts, guarantees, permissions and organisational access.

Product Designer · Tamdid · Remote — Aug 2025 - Jun 2026

- Designed a fintech product for smart subscription and wallet management, covering payments, wallets and gamification; built a custom design system. Design completed; in development.

Case study ↗

UI/UX Designer · ChapAgha · Remote — Dec 2024 - Jan 2025

- Redesigned the responsive product listing page for business cards, with a clearer layout and stronger mobile usability.

Dribbble ↗

Product Designer · Novaday · Full-time (hybrid) — Sep 2024 - Jun 2025

- Designed two B2B products on a Tailwind-based design system to improve consistency and streamline admin workflows.
- Kudos: documented flows and page logic to improve coordination between design and development, and refined the UI; worked closely with PM and QA for smooth delivery.
- Remeet: a multilingual web and mobile access system with biometric (fingerprint/RFID) check-in for meetings and access, integrated with Outlook to automate bookings and make better use of rooms. Winner at Tehran Design Week.

UI/UX Designer · Nan va Namak · Remote — Jun - Sep 2024

- Designed a responsive interface for web, mobile and tablet with a focus on accessibility, usability and clear content discovery.

Story ↗ Dribbble ↗

UI / Visual Designer · Jaygah · Remote — Mar - Jun 2024

- Collaborated on B2B/B2C marketing packages and digital content, improving visual communication across campaigns and social touchpoints.

Educational Content Designer · AlaaTV (Online School) · Full-time (hybrid) — Aug 2021 - Apr 2023

- Worked with cross-functional teams to design and structure educational content, improving visual clarity, layout and the overall learning experience.
